**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments, filed on November 13, 2006, with respect to claims 2-11, and 14-18 have been considered and are persuasive. The new limitations to independent claims 14-18 have not been found or suggested by prior art. The rejection of claims 2-11, and 14-18 has been withdrawn.

**Allowable Subject Matter**

2. Claims 2-11, and 14-18 are allowed.

3. The following is an examiner's statement of reasons for allowance: References Eriksson et al (US 2001/0012778 A1) and Park et al (US 2003/0114159 A1) are made of record as teaching the art of wireless communications with a network node processor configured to handle call traffic and, record measurement data, and detect processor load.

However, none of the cited prior art teaches or suggests directly or indirectly "to automatically adjust the rate of recordal of measurements dependent on detected processor load so as to keep the processor load within predetermined limits, and the measurement records being event records that include call events, and in which the processor load is allowed to increase to beyond a first threshold whereupon the rate of recordal of measurements is reduced in successive steps until the processor load falls below a second threshold whereupon the rate of recordal of measurements is increased in successive steps, the first threshold being higher than the second threshold" in combination with other limitation of the independent claims 14-18.

Any comments necessary by applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
